SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable web applications, RESTful APIs, and secure authentication systems. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js, with strong skills in TypeScript, PostgreSQL, MySQL, and Tailwind CSS. Demonstrated ability to architect role-based access control systems, implement JWT-based authentication, and deploy production-grade applications on Vercel and Render. Passionate about writing clean, maintainable code and delivering high-performance user experiences. Actively seeking a full-stack or backend developer role to contribute to impactful products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, C, C++, Python

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js

Databases: MongoDB, PostgreSQL, MySQL

Frontend & Design: HTML5, CSS3, Tailwind CSS, Responsive Design

Tools & Platforms: Git, GitHub, Postman, XAMPP, VS Code, Vercel, Render, GitKraken

Concepts: REST APIs, JWT Authentication, RBAC, MVC Architecture, Server-Side Rendering (SSR)

PROJECTS

LeetCode Clone — Full-Stack Coding Practice Platform

GitHub: github.com/jkbhatt/leetcode-clone | Live: leetcode-clone-black.vercel.app

- Architected a full-stack competitive programming platform using the MERN stack and Next.js, enabling server-side rendering for optimized performance and SEO.
- Engineered secure JWT-based user authentication, an interactive coding problem engine, personalized user dashboards, and a real-time global leaderboard.
- Developed scalable REST APIs integrated with MongoDB for efficient data persistence and rapid query retrieval.
- Built a fully responsive UI using Tailwind CSS; deployed frontend on Vercel and backend on Render via GitHub CI workflows.

ProjectFlow — Collaborative Project Management Application

GitHub: github.com/jkbhatt/projectflow | Live: projectflow-pi-opal.vercel.app

- Built a high-performance RESTful API service supporting hierarchical task tracking, protected routes, and multimedia attachments.
- Architected a three-tier Role-Based Access Control (RBAC) system (Admin, Project Admin, Member) enforcing granular data permissions across all endpoints.
- Implemented JWT session management, secure refresh token rotation, and encrypted password recovery workflows.
- Integrated automated health monitoring alerts and email verification services; documented all endpoints via Postman.

Portfolio Website — Animated Developer Portfolio

GitHub: github.com/jkbhatt/portfolio | Live: portfolio-one-livid-55.vercel.app

- Designed and developed a fully responsive portfolio using Next.js, Tailwind CSS, and Framer Motion with smooth animations and glassmorphism UI.
- Integrated EmailJS for a functional client-side contact form delivering messages directly to Gmail without a backend server.
- Deployed on Vercel with automatic CI/CD from GitHub; optimized load times via Next.js image optimization and static generation.

Personal Digital Diary — Full-Stack PHP Web Application

- Designed and deployed a responsive full-stack web application using PHP and MySQL to securely manage multimedia notes with image upload capabilities.

- Implemented full CRUD backend logic ensuring reliable data persistence, optimizing query execution on a XAMPP-hosted server environment.
- Crafted an intuitive frontend interface using HTML5 and CSS3 for a clean and engaging user experience.

EDUCATION

Bachelor of Technology in Information Technology

Silver Oak University, Ahmedabad, Gujarat

2022 – 2026 | CGPA: 8.31 / 10.0
